

We are a carbon capture company; our bi-product is high performing and healthy homes!

We are passionate about building with hempcrete for two simple reasons, firstly it has huge environmental benefits, and secondly it's ability to wrap your home in a naturally insulating breathable blanket.

Why build with *Hemp* Blocks?

- ✓ Eco friendly
- ✓ High insulative properties
- ✓ Sound absorbing
- ✓ Non-Flammable
- ✓ Thermal mass
- ✓ Carbon negative
- ✓ Energy saving
- ✓ Durable
- ✓ Easy to use
- ✓ 100% natural

Hempcrete is an amazing natural building material with many advantages unfortunately, there have traditionally been several issues which have restricted its wider use, such as requiring specialist knowledge, inconsistent supply and ultimately higher cost.

We have resolved these issues by using hempcrete blocks, which require no specialist skills or equipment, and by Partnering with Senini we have secured a regular high-quality supply, making the blocks more cost effective and available for more general use.

Insulating

Sound Absorbing

100% Natural

Non-Flammable

Carbon Negative

Energy Saving

Durable

Are hempcrete blocks for you?

- ✓ Are lower running costs more important to you than low cost up-front?
- ✓ Is living in a healthy home with no chemical off-gassing important to you?
- ✓ Are you concerned about the environmental cost of your material choices?
- ✓ Would you like your home to clean up the atmosphere by capturing and locking up carbon?
- ✓ Are you willing to adapt your design in pursuit of the above aims?
